HAVRE, Oct. 20.—Today's Belgian official communication says: "The offensive operations of the armies in Flanders under the command of Gen. Rio continued Sunday. After attempting to oppose our advance on the west bank of the Lys River and the Bruges Canal from Eecloo to the Dutch frontier the Germans were obliged to retreat along the whole front. The Belgian army is standing along the canal, its left resting on the Dutch frontier. "The French army in Belgium has not only driven beyond the Lys the enemy rear guards, but has even, notwithstanding the inundations caused by the Germans, crossed that river, establishing two bridgeheads—one between Grammene and Peteghem, the other at Oyghem. "The Second British Army, overcoming violent enemy resistance and difficult communications, crossed the Lys along its whole front and has attained on the right the western outskirts of Pecq, in the Scheldt Valley. The front of this army passes through a line west of Pecq, the outskirts of Dotignes, east of Rollinghem, Vichte and Wielsbeke. It has taken, since October 14, 6509 prisoners and 169 guns."

NEW NOTE IS ON WAY. CHAOS RIPS

Reply is Started Germany in Throes of Huge Crisis.

AMSTERDAM, Oct. 20.—The Spanish government, according to the newspapers, has received a German official communication stating that the German government has ordered submarines to return immediately to their bases.

LONDON, Oct. 20.—According to unofficial reports reaching Amsterdam this morning, the German reply to President Wilson was delivered to the Swiss Minister in Berlin Saturday evening.

PARIS, Oct. 20.—The German government, it is added, denies responsibility for the loss of women and children on torpedoed passenger ships, but to advise the German government to stop unrestricted submarine warfare.

AMSTERDAM, Oct. 20.—According to reports reaching here today from Germany, the German reply to President Wilson may not be ready until Monday.

PARIS, Oct. 20.—The German reply to President Wilson, it is said, contains a note to Germany announcing immediate suspension of submarine warfare and other political guarantees.

BERLIN, Oct. 20.—The German government, it is said, has received a note from the Allies, which contains a demand for the immediate suspension of submarine warfare.

LONDON, Oct. 20.—The German reply to President Wilson, it is said, contains a demand for the immediate suspension of submarine warfare.

French "City Beautiful" Recaptured by Allies.

City of Lille. Famous manufacturing center of France which has been retaken by the Allies after it was four years in the hands of the Germans. The city is reputed one of the most beautiful in the world. It was spared by the Germans and the British troops in advancing swept around the city on all sides without entering to prevent its being bombarded. The war is reported to have left few landmarks on the city except for the robbery of machinery from its many factories.

JAPAN OPPOSES CONQUEST.

Military not Dominant, Commoner Premier says; Open Door to be Observed.

TOKYO, Oct. 20.—Takashi Hara, Japan's first Commoner Premier and leader of the Seiyukai party, said in his first statement of his policies that Japan had no intention of conquest.

PARIS, Oct. 20.—The Japanese government, it is said, has received a note from the Allies, which contains a demand for the immediate suspension of submarine warfare.

NEUTON TROOPS CUT OFF BY THRUST OF BELGIANS.

British Force Passage of Selle River Advancing on Ten-Mile Front; Rush of Allies Continues.

LONDON, Oct. 20.—Fifteen thousand retreating German soldiers have been interned in Holland, after being cut off by Belgian troops moving northward from Eecloo, according to reports from the frontier reaching Amsterdam and transmitted by the Exchange Telegraph Company.

PARIS, Oct. 20.—In their attack this morning the British troops succeeded in forcing a passage of the Selle River between Le Cateau and Denain, Field Marshal Haig reported tonight.

THE BRITISH ADVANCE. The British advance continues further north, and Denain, five miles southwest of Valenciennes, has been captured. The British have reached the general line of Haveluy, Wandignies, Hamage, Brillon, Beuvry.

BATTLE SUMMARY

ALLIES WIN ON ALL FRONTS. (Resume by Associated Press.) Victory crowns the Allied arms on every battle front. Northern Belgium is rapidly being cleared of the enemy by British and Belgian forces.

THE SOUTH FRONT. (Resume by Associated Press.) The British advance continues further north, and Denain, five miles southwest of Valenciennes, has been captured. The British have reached the general line of Haveluy, Wandignies, Hamage, Brillon, Beuvry.

PACIFIC STEAMSHIP COMPANY

TRAVEL BY SEA. SAILING FOR: SAN FRANCISCO, SEATTLE, TACOMA, S. S. City of Tokyo, Tuesday, Oct. 22nd. S. S. President, Thursday, October 24th.

STEAMSHIPS

THE SAN FRANCISCO & PORTLAND STEAMSHIP LINES. S. S. ROSE CITY. EXACT TOTAL OF SUBSCRIPTIONS NOT KNOWN, BUT OVER \$6,000,000 CLAIM.

QUARTER OF NATION

WASHINGTON, Oct. 20.—California secures one of the six great motor corps repair depots, to be located in the United States. This depot will be located at San Francisco, and will serve the whole Rocky Mountain and Coast section.

MOTOR REPAIRS DEPOT ON COAST

One of Six to be Located at San Francisco. Only Old Machines and Convey Units Affected. District Officer to be in Command of Post.

BUY LIBERTY BONDS.

WASHINGTON, Oct. 20.—Probably \$6,000,000 of more individuals bought bonds of the Fourth Liberty Loan, unofficial reports reaching Washington today showed. A large proportion of these filed their subscriptions during the last few days of the campaign. Consequently, it will be a task of many days to count the number of pledges and compile reports from the entire country.

DEFINITE FIGURES AND THE TOTAL SUBSCRIPTIONS TO THE LOAN WERE NOT AVAILABLE TONIGHT.

Local and district campaign managers, fatigued with their arduous duties, will not start until tomorrow to figure up the avalanche of last-minute purchases. The only official figures in hand were those of Friday night, showing about \$1,400,000,000 yet to be subscribed.

DESPITE THIS LACK OF DEFINITE INFORMATION, OFFICIALS WERE CONFIDENT THE \$6,000,000 POPULAR WAR CREDIT CAMPAIGN WOULD BE A SUCCESS.

The official count of San Francisco's subscription to the loan stood tonight at \$7,649,196. Campaign officials said they were hopeful the total would be more than this city's share of \$10,000,000. Campaign officials expect to know definitely until Tuesday or Wednesday.

TWELFTH DISTRICT.

SAN FRANCISCO, Oct. 20.—Winners in the Twelfth Federal Reserve Bank district ship and tanking contests of the Fourth Liberty Loan will not be known until a careful check has been made of official over-subscriptions by cities and counties in the district. It was announced here tonight, it was estimated this might take days.

THE OFFICIAL COUNT OF SAN FRANCISCO'S SUBSCRIPTION TO THE LOAN STOOD TONIGHT AT \$7,649,196.

Campaign officials said they were hopeful the total would be more than this city's share of \$10,000,000. Campaign officials expect to know definitely until Tuesday or Wednesday.

WINNERS IN THE TWELFTH FEDERAL RESERVE BANK DISTRICT SHIP AND TANKING CONTESTS OF THE FOURTH LIBERTY LOAN WILL NOT BE KNOWN UNTIL A CAREFUL CHECK HAS BEEN MADE OF OFFICIAL OVER-SUBSCRIPTIONS BY CITIES AND COUNTIES IN THE DISTRICT.

It was announced here tonight, it was estimated this might take days.

OSBORNE ON WAY TO LOS ANGELES.

Congressman Coming Home for Period of Recess.

Business Matters Here will Receive Attention.

Pomona College Instructor is Made Lieutenant.

BY ROBERT B. ARMSTRONG. (EXCLUSIVE DISPATCH.)

WASHINGTON, Oct. 20.—Congressman Osborne left last night for Los Angeles to receive attention to business matters here during his period of recess. The house has completed its work for the session and will adjourn until after election day. Any important business will go over until after that date and even technically Congress will not reconvene, except for emergency.

While Capt. Osborne is not coming home to make any campaign for re-election, he still will have a number of things of important character to take up some of his time. One of the most important is to confer with the military commission that is on its way to the Coast to locate some of the emergency hospitals for the army. When returned here, he will find that at least one of the hospitals will be located in the southern part of California, and if the recommendation of the medical department of the army is taken, the Los Angeles section should secure at least two institutions of this character. One will probably be the Arrowhead Springs Hotel and Property.

Congressman Osborne's presence in Los Angeles is especially important, as the personnel of the commission has been greatly changed since the western trip was undertaken. Gen. R. E. Noble, chairman of the committee, was recalled and sent to France on an urgent quest. Gen. George, head of the medical department, Gen. Noble was personally familiar with the opportunities and facilities of Southern California, and on account of the change and the unfamiliarity of the local conditions of the hospital, it is extremely fortunate that Congressman Osborne can be present to advise the military commission.

Philip Danner, well known as an instructor of chemistry in Pomona College, Claremont, has been commissioned as a second lieutenant in the army and is on his way to France. His appointment to this post is a great honor, and he is an unusual tribute to the methods of promoting men who are capable of the highest achievement. Danner's mother lives in Pasadena.

J. B. Lippincott of Los Angeles, one of the experts in charge of the aqueduct in Los Angeles, and since then engineer for Hampton & Co., who are building the great aqueduct at North Island, has been put in charge of the building of the new aqueduct. The plant will be the greatest ordnance plant in the world—exceeding in capacity the famous Krupp works and the great ordnance plant known. The part of the work that has been assigned to Mr. Lippincott is to build a new ordnance plant of 600 and is one of the biggest housing propositions in the government program.

That California beans have been one of the big business of the method of purchase of the 125,000 pounds used by the army every day is of great interest to California and the local bean growers. It is paid to the growers of beans taken for the government. Inspection will be made in the producing field and there will be no delay in the payment for accepted stock. All beans for the army must be of the navy of the United States will hereafter be purchased through the Federal Grain Corporation. Inspectors of the corporation will be sent at once to all the bean fields in the state to make the purchases from growers at the lowest prices possible to obtain. The government of which will probably give the grower good or even better prices than at present.

CANADIAN GOLFER MUST GUARD TITLE.

George S. Lyon, veteran of three score years, has been looked upon as the leading amateur golfer of Canada for the last decade, but he will have to look fast to his laurels, for a new contender has appeared in the person of a young man named Mr. Lyon's son, Seymour, whose injury in a European battle, does not appear to have impaired his playing ability. The other day he was paired against his father in a war-fund golf match and honors were with the son, who had a round of 78, as compared with his father's 79. It was considered the best exhibition of golf ever seen on the Kitchener Club course.

SOLDIER ATHLETES CLING TO VARIETY.

Some idea of the sports indulged in by enlisted men at the cantonments can be had from the exercises at Camp Funston, Kan., recently when a tug-of-war included 100 men on each end, and a push ball contest had fifty men on a side; a human-burden race had sixty men on a side; a hand-saw race had thirty men on a side; a dash brought 100 men to the starting line. In addition there were many running races and pumping contests.

KEARNY BOYS TAKE HAND AT RING GAME.

CAMP KEARNY, Oct. 20.—Two fast boxing matches were the big feature at an entertainment given in honor of Gen. Shanks. The program was given at the division headquarters under the supervision of the division athletic officer. J. A. Keane, boxing coach, and his team of the division athletic officer. J. A. Keane, boxing coach, and his team of the division athletic officer. J. A. Keane, boxing coach, and his team of the division athletic officer.

MARRIED IN PORTLAND.

Paul G. Clark, a graduate of the Los Angeles High School, was married last Saturday in Portland, Ore. Miss Caroline Clark, daughter of the late Mr. Clark, was the bride. The ceremony was performed by the Rev. A. L. Clark, pastor of the First Methodist church in Portland. The bride and groom were accompanied by their parents and a large number of friends.

WOMAN HANGS SELF.

Dependent, it is said, because of the death of her husband last Saturday in the County Hospital, Mrs. Teresa Kataklymka, 26 years old, of No. 2743 Eagle street, last night hanged herself with a silk scarf in the home of her sister, Mrs. Mary Fugusawa, No. 228 Hewitt street. The body was found by Father A. Seretian, and the woman's sister, according to the report of Detective-Sergeant Leon.

TRAVELED FAR TO ENLIST.

John Campbell, the Mackinac Indian who traveled the 2000 miles between Port Yukon and Vancouver to enlist in the Canadian army, has a still greater distance to go before he makes acquaintance with the enemy in France. To cross the continent is 2000 miles and there is the smaller voyage of a couple of thousand miles to the Atlantic. The call to duty reaches far and is heard even in the solitude of Canada's far north.—(Montreal Gazette.)

SIBERIA AMERICA'S FRIEND.

United States Soldiers Everywhere Accorded Warm Reception.

BY CARL W. ACKERMAN. (BY PACIFIC CABLE AND A. P.)

Winter begins in November. Gen. Graves has decided upon returning to Vladivostok, whether the men remain here or not. Because of the splendid facilities this probably will be one of the winter camps.

In Khabarovsk the Russians believe the Bolshevik life is measured by the ability of Germany's military machine to hold out. With the splendid advance in the west, every gain is also a gain in Russia, because Germany is being weakened here too. Once Teutonic prestige is destroyed, the power of the Bolshevik will crumble. In case this happens, none can tell what attitude the Allies may have to adopt in Siberia. They may be able to proceed to Moscow or Petrograd upon the request of the Bolshevik's successor. While weeks ago this did not seem possible, there are peace-making events taking place in Europe daily, and politics and policies have been adjusted constantly to the changing situation. While Allied Russian and German propaganda has endeavored to create the impression that America intends to annex the Amur province, one finds the attitude of the average Russian toward this rumor is skeptical. Gen. Graves was interviewed with Gen. Ol and the Cosack, Gen. Kalmykov, was received by both commanders. Gen. Ol holds the opinion that it is practically impossible now to establish an eastern front, but he is exceedingly interested in the peace possibilities, as all of the resident officers are interested, not only because of the future possibilities of the expedition, and whether it remains after peace. Gen. Kalmykov, the 26-year-old leader of the Cosacks, whose forces are co-operating with the Allies to maintain order, declared that he was fighting for no political party, only for Russian unity.

CONGRESS TO CLEAN UP WORK FOR RECESS.

LEGISLATION TO BE RUSHED THIS WEEK SO LAWMAKERS CAN GO HOME.

(BY A. P. NIGHT WIRE.) WASHINGTON, Oct. 20.—Congress this week will clean up urgent legislation in preparation for a two-week recess over the November elections. The most important matter is the \$6,000,000,000 deficiency bill passed last week by the House, now before the Senate Appropriations Committee.

While the Senate is disposing of this, the House will mark time by the beginning of the recess on October 25. The Senate Appropriations Committee plans to report the army bill by Wednesday and lead the aspect to pass the measure this week.

Because of the illness of Alexander Konta of New York, one of the principal witnesses, the Senate Judiciary Committee's investigation into the purchase of the Washington Times by Arthur Brisbane through money advanced by Eugene C. Dwyer, I. lead from the most reliable source in the Dutch capital that the German government is thoroughly aware that any conditions of armistice cannot be other than tantamount to Germany's placing herself at the disposal of the Allies. Whether the Berlin government in its reply will go as far as all at once to admit all that is somewhat doubtful in the quarter referred to. In the interim the Pan-German influence is hard at work, and all prominent government and military personages in the Teutonic empire are overwhelmed with telegrams from every conceivable German organization. For instance, the Krupp officials union, claiming to be the sentiment in favor of some means to consolidate the Krupp empire, demanding all preparation be made for the national defense. A sufficient number of words have been used during the last few weeks," this message says, "and now we are waiting for the people to wait the call from Berlin. May it not be long in coming?"

On the other hand, the large party demonstration at Essen, the Krupp center, on Wednesday night, was broken up by Socialists.

DATE OFFICERS' SCHOOL.

Officials Fix December 1 at Camp Fremont for Next Two-Month Training Camp.

(BY A. P. NIGHT WIRE.) SAN FRANCISCO, Oct. 20.—Establishment of an infantry officers' training school at Camp Fremont, Cal., on December 1, was announced by the Western Department of the army here today. The course will continue approximately two months. A total of 1000 candidates will be selected for the camp, 440 of them from California.

Draft registrants between 18 and 46, except those in class 1, who registered prior to September 12, or those in deferred classifications on account of industrial occupations, including agriculture, may apply for admission.

ARTISANS VICTORIOUS IN PRACTICE GAME.

A rather impromptu football game was played Saturday afternoon between the Manual Arts team and the Santa Ana team. The game was played on the latter's grounds, the village aggregation getting bested to the time of 10 to 7.

Arrangements for the game were made only the day previous, both teams being in practice. At the end of the first half the score stood 7 to 0 for Manual Arts. In the last half through a push caught forward pass, and a good down-field run, the Santa Ana Villagers gained seven points. The best playing for the Artisans credited to Cole and Erb Hermann, and for the Villagers, Rainey. The Manual team average is not quite as good as last year, being but 147 yards per game, as against 167 between 1916 and 1917. The Villager squad showed 155 pounds as an average.

SAFETY FIRST FOR SPANISH INFLUENZA.

SPANISH INFLUENZA is caused from the absorption of the virus of the disease into the body through the pores of the skin. It is not transmitted from one person to another. Each day more and more people are realizing the danger of the disease. If the fever is not lowered, the lungs will be inflamed and the spitting of blood and breathing will be rendered very difficult. If you shiver and sneeze, you should take a dose of the most valuable medicine known to man. It is called FLORER HERB. This oil has proved very effective in the treatment of the disease. It may be had at 10c a bottle from the Reg. Feb. 22, 1903, No. 32851.

COACH AND WIFE BOTH JOIN NAVY.

Grant Ward, formerly assistant football coach at Ohio State and later head of the Coleridge Department of Recreation, has a family of 100 per cent in the war service. Grant is at Great Lakes in the Naval Training School, and Mrs. Ward, a few days ago left for Norfolk, Va., to join the navy as a yeoman. Her clerical services will relieve a man for active duty on the sea.

BIG BOXING CARD PUT ON FOR JACKS.

BAIRBOA PARK PROGRAMME FURNISHES PLENTY OF GINGER.

(EXCLUSIVE DISPATCH.) NAVAL TRAINING CAMP, BAIRBOA PARK, SAN DIEGO, Oct. 20.—A record crowd of "Jacks" of the evening boxing card attended the evening boxing programme which was staged on the plaza last night under the direction of Lieut. J. S. Conover, U. S. Navy. The programme was a fast one and consisted of several bouts that contained the most exciting action of the season. Will Brown took the measure of Everett True in the opening, after four fast rounds. The second contest was awarded to Tommy Myrick after he fought three rounds which he won by a knockout. Myrick carried too much weight in his left and he had little trouble in disposing of True. The third round was to sleep in the opening session. "Tami" Hamric was in the same division as Will Brown, but he was defeated by Everett True in the first round to dispose of Art Crawley, sending him to the mat for the count. The fourth round was a fast one, right to the jaw. Willie Parker and his brother Eddie must have had it all framed before they entered the ring. They fought hard and exchanged plenty of blows, but neither was able to get a decision. As a feature of the programme, Dutch Crozier, prominent local fighter, boxed a four-round exhibition with Lew Shauer. Tubby Baker won from Spike Kelley in the final bout, taking three of the four rounds in easy fashion.

PUSH WAR AGAINST THE MOUNTAIN LION.

(LOCAL CORRESPONDENCE.) SANTA BARBARA, Oct. 20.—Trail building and repairing work in the Santa Barbara forest reserve. All the rangers are now employed in mending the trail breaks which occurred during the summer, and in cutting new trails through the forest. As outlined by Supervisor Hall evening giving the public a trail into the forest. During all the winter months, and until next June every ranger will be engaged in trail building and grubbing holes. There are some sections of the reserve into which no human foot has yet been, and these sections will be opened up. In those sections the lair of the lion is located, and the trail is expected to aid in the campaign now on against the lion, which has very steadily increased in number.

WAR WILL BRING ATHLETIC REFORMS.

Although some of the eastern universities have been slow getting into athletic action because of the war, the sentiment in favor of some means to consolidate the athletic forms is getting stronger. There are a good many reforms now on foot on account of war conditions. They may be enumerated as follows: No training table, abolition of long periods of preliminary training for football, reduction of football officials' reduction of coaching expenses, holding regattas during the term of the war. There has been a decided change for the better in the fight against proselytizing.

JIMMY BARRY CHOSEN ARMY BOXING TUTOR.

Jimmy Barry, the Chicago boxer, undefeated champion bantamweight of the world, has been appointed an army boxing instructor. He is now taking two weeks' bayonet practice at Camp Fremont.

Barry retired from the ring shortly after his return from England, which he fought with Walter Cook. It broke Barry's heart and he quit the ring. He is 48 years of age.

FOR LEAGUE ISLAND.

Bob Peck, former University of Pittsburgh, has been selected to play for the League Island, Philadelphia navy yard team. It is said Red Fleming, former Washington and Jefferson half-back, may also be a member of the eleven.

FOO & WINGHERB CO.

Safety First for Spanish Influenza.

SPANISH INFLUENZA is caused from the absorption of the virus of the disease into the body through the pores of the skin. It is not transmitted from one person to another. Each day more and more people are realizing the danger of the disease. If the fever is not lowered, the lungs will be inflamed and the spitting of blood and breathing will be rendered very difficult. If you shiver and sneeze, you should take a dose of the most valuable medicine known to man. It is called FLORER HERB. This oil has proved very effective in the treatment of the disease. It may be had at 10c a bottle from the Reg. Feb. 22, 1903, No. 32851.

WILL TAKE OFF ALL EXCESS FAT.

FLORER HERB is a simple, safe, and effective remedy for the removal of excess fat from the body. It is a natural product and does not contain any harmful ingredients. WE LEAD IN NEW OIL WELLS.

One Hundred and Four Have Been Put Down in Southland this Year.

Notices filed with the California State Mining Bureau for the week ending October 5 show eight new wells ready to drill, making a total of 571 wells reported since the first of the year.

Of this total, ninety-four wells are listed in the Kern County district, 238 in Kern county, 194 in Los Angeles and Orange counties, thirty-six in Ventura county, and thirty-seven for Santa Barbara and adjoining counties. A total of 868 wells were reported for the same period during 1917.

The largest number of new wells reported for any one week was thirty-eight for the week ending May 18. The average number of wells reported per week so far this year is fourteen, compared with an average of twenty per week last year. No new wells were reported in Midway-Sunset fields during the past week.

This adjustment of affairs is eagerly awaited by local oil men, who have for some time planned operations of various properties in Kern county, but who have been unable to go ahead, pending settlement of the receivership of the old oil company.

As an example of the condition that prevails here, it is to be noted that of the thirteen new wells started during the past week, nearly all of them are in the Kern county, and not in the old oil company's territory, the "wildcat" not being willing, it is said, to take the chance of the possibility of a prohibitive tax.

There is one company, however, which has authority to give "wildcat" wells the same treatment as those in the old oil company's territory. This company has picked up to such an extent that it is now well on the way to prosperity.

The Standard Oil Company is again taking the lead for actual development work being done. During the week ending October 5, it reported the completion of two new wells in section 11, 21-24, and is going ahead with the work with a view to producing a record production for Kern county.

The Midway Oil Company is also drilling two new wells in the Sunset field. They are both located on section 35, 12-24. The rigs for these wells were completed last week and drilling was started at once.

The Midway Gas Company and the Honolulu Consolidated have also started drilling operations in the Midway field. The former concern is putting down a new well on section 15, 32-24, and the latter has started work on section 6, 32-24.

The Standard Oil Company is again taking the lead for actual development work being done. During the week ending October 5, it reported the completion of two new wells in section 11, 21-24, and is going ahead with the work with a view to producing a record production for Kern county.

IN TEXAS OIL DISTRICT.

Fuel Administration Approves Plan for Pipe Line of Large Capacity.

[SPECIAL CORRESPONDENCE.] It is said that this is now being done in the Tampico region of Mexico where the oil is heavier than the Central Texas product.

The pipe line of the Prairie Pipe Line Company will be equipped with five pumping stations, situated at intervals of about twenty miles apart. This company will have finished soon its eight-inch pipe line connecting the Cushing (Okla.) field with the Gulf.

The Texas company, which recently completed a large pipe line from an eight-inch pipe line from Ranger to Fort Worth, will have an extension of this line from Fort Worth to Dallas completed soon. At Dallas the line will connect with the company's Oklahoma-Fort Arthur trunk pipe line.

The Gulf Pipe Line Company will construct an eight-inch pipe line from Fort Worth to the Gulf. The Magnolia Petroleum Company applied for a permit to lay an eight-inch pipe line from Fort Worth to the Gulf, but this was refused by the oil division of the Fuel Administration.

It is a pleasure to give you qualitative analysis on the rather low grade and impure minerals submitted for tests.

No. 1 is impure, massive garnet probably suitable, when ground up, for abrasive purposes. No. 2, quartz, arsenic, nickel, etc., so I ask you to have on hand in Ranger and other Central West Texas fields. The tank farms of the different companies will be increased rapidly. The Prairie Oil and Gas Company now has more than 100,000 barrels of oil in storage at Ranger and is building and filling additional 65,000-barrel tanks at the rate of one every three days.

It will take some time for these several companies to transport the oil to the Gulf. The Prairie Oil and Gas Company now has more than 100,000 barrels of oil in storage at Ranger and is building and filling additional 65,000-barrel tanks at the rate of one every three days.

It will take some time for these several companies to transport the oil to the Gulf. The Prairie Oil and Gas Company now has more than 100,000 barrels of oil in storage at Ranger and is building and filling additional 65,000-barrel tanks at the rate of one every three days.

RARE MINERALS, METALLURGY, CHEMISTRY.

for chromite quality and quantity.

A: The rock is chiefly altered serpentine; iron disulphide sparingly present, and there is approximately 2 per cent. chromite in the mass. The "quality" of this ore is very poor indeed.

Bentonite. KINGMAN (Ariz.) Oct. 5.—Q: Please state what the inclosed sample consists of. It is from a deposit about eighteen miles north of Kingman. Does it contain available potash?

A: The sample is: "A" banded plastic clay which swells immensely on wetting, and it contains no water soluble potash.

Aluminous Marl. JACUMBA, Oct. 5.—Q: Being a reader of your paper for the last eighteen years, and knowing that you have a department on minerals, I take the liberty of sending you a sample for test, etc. I would like to have a description of the mineral. Thanking you in advance.

A: The sample is very much altered rock. It contains some 10 per cent. iron-magnesium silicate (clay) is more or less present with iron oxide (limonite) traces. Tested for available potash with negative results.

Halotrichite. CORONA, Oct. 5.—Q: I am sending samples under separate cover for analysis. No. 1 contains magnesia. No. 2 contains alum; does it carry free sulphur? Samples are from Riverside county.

A: No. 1 sample could be referred to as an aluminous-iron red oxide, or rutile; magnesia, white present, is in such low percentage that it is of no value commercially. No. 2 is impure "iron alum," otherwise known mineralogically as halotrichite. Free sulphur very sparingly present.

Permatite. LOS ANGELES, Oct. 5.—Q: Please name the inclosed sample and give its composition. J. A. M. A: The sample is the rock pegmatite, and it is composed of quartz, orthoclase, potash feldspar, and as a chemical compound, but on the order of a mechanical mixture. The feldspar is of no value for potash content, but is of value for the reason that it is not water soluble or "available." The crystals in the rock are those of orthoclase, and (schorl) and such tourmaline is of no gem value.

Eagle Stone Variety. LOS ANGELES, Oct. 7.—Q: Please classify sample, said to be manganese ore, and if so, has it commercial value? Found in San Diego county.

A: At sight the sample resembles a good deal the manganese ore, but when broken it shows up as chiefly lime-iron and aluminum silicate with a very thin coating of iron-manganese oxide. Such rock is of no value commercially.

Conglomerate. JOHANNESBURG, Oct. 7.—Q: I am sending you under separate cover a sample of a big deposit that I have looked upon as aluminum ore. The sample is a conglomerate (by parties that should know) as "potash feldspar." Kindly advise me if it is promising enough to have analyzed.

Acid and Base. LOS ANGELES, Oct. 2.—Q: Will you kindly inform me the value of silicon or aluminum, particularly in its use in the manufacture of acid employed in producing steel. B. A. M. A: It is probable that the process outlined by you is of laboratory interest only.

Quartz. LOS ANGELES, Oct. 1.—Q: Please advise if this sample is amethystine. It is from near Pala.

A: The sample is a mineral. California produces it sparingly, and it occurs in New Jersey, North and South Carolina, New York, Texas, Oregon and Virginia. In chemical composition it is silicon dioxide.

Zeolite. LOS ANGELES, Oct. 1.—Q: Will you kindly inform me the value of silicon or aluminum, particularly in its use in the manufacture of acid employed in producing steel. B. A. M. A: It is probable that the process outlined by you is of laboratory interest only.

Zeolite. LOS ANGELES, Oct. 1.—Q: Will you kindly inform me the value of silicon or aluminum, particularly in its use in the manufacture of acid employed in producing steel. B. A. M. A: It is probable that the process outlined by you is of laboratory interest only.

Zeolite. LOS ANGELES, Oct. 1.—Q: Will you kindly inform me the value of silicon or aluminum, particularly in its use in the manufacture of acid employed in producing steel. B. A. M. A: It is probable that the process outlined by you is of laboratory interest only.
